Introduction

I was graduated from Naresuan University since 2011 from CSIT department. For the present I am working at Nakhonsawan Rajabhat University as an academic supporter for 3 years.

Now, I have a plan to resign and go to study full-time master program. Because I want to advance my knowledge and skills.

OBJECTIVE

I believe in the power to dreaming and learning of the youth. To keep moving forward of my life. I decide to enroll the Master of Computer-Science program at Naresuan University. After spin-off to work for 4 years in the academic supporter that working not much relate to computer-science so, I think it is the time to get back to do what I love again, with great lecturers good environment and society. I believe these can develop and improve my potential to be a skills person in computer-science. I feel really happy to back in the line of code again.

INTEREST
